

VORAGO Technologies Expands Executive Team with New VP of Sales

Dynamic semiconductor executive, Anne Joubert, tapped to accelerate growth for high-temp/RAD solutions

AUSTIN, TX, December 8, 2015 – VORAGO Technologies, the leading provider of radiation and extreme heat-hardened embedded systems technology, today announced it has appointed Anne Joubert as its Vice President of Sales. Joubert will be responsible for driving revenue and building the company's global sales organization, which offers VORAGO Technologies semiconductor products as well as the licensing of its patented HARDSLIL[®] technology.

"Adding Anne to our team is the next step toward our goal of putting the latest in semiconductor technologies into the hands and imaginations of designers and engineers around the world," said Bernd Lienhard, CEO of VORAGO Technologies. "Her proven track record and extensive experience will be invaluable to the continued growth of our business and the success of our customers."

Joubert is a semiconductor veteran with over 25 years of experience, and has held senior sales leadership roles at companies that include Knowles Corporation and Audience Inc., Dialog Semiconductor, Qimonda, Infineon Technologies, and Texas Instruments.

About VORAGO Technologies

VORAGO Technologies, previously known as Silicon Space Technology, is a privately held, fabless semiconductor company based in Austin, TX with patented and proven solutions that remove the limitations of both radiation and heat-related failures inherent in traditional technology. VORAGO's patented HARDSLIL[®] technology can be integrated into the standard silicon manufacturing process to enable components to withstand the most extreme conditions, including temperatures beyond 200°C, while providing exceptional longevity. VORAGO's microcontroller products are based on HARDSLIL and are well suited for automotive, industrial, military / aerospace and networking applications. VORAGO Technologies opens up a new envelope of possibilities for your designs, no matter how hostile the environment. www.voragotech.com
